DARÍO SEMINO

FRONTEND DEVELOPMENT - REACT

I come from the field of writing and book editing. Since 2020, I started working on writing content for websites, and since late 2021, I became interested in web development, primarily Frontend, with some knowledge of Backend. I enjoy learning by doing, and whenever possible, I try to increase the complexity level of each project.

SKILLS

Learning ability and intellectual curiosity. Ability to explain complex concepts in simple and accessible terms. Oral and written proficiency in English and French. Passion for design and patience for responsive design. Adaptability to different environments and workgroups. Ability to make independent decisions when necessary.

LANGUAGES

English - Full professional proficiency

French - Full professional proficiency

Spanish - Native

RECENT EXPERIENCES

Developer (ongoing project)

www.gerontovida.netifly.app

New website for the Gerontovida Civil Association. Developed using React, Redux, React-Router, React Bootstrap and React Chart for chart generation. At the moment, the backend is handled with MockAPI.

Developer

www.arteludovica.com.ar

Website dedicated to the history of the Arteludovica Theater Company. Developed using HTML, CSS and JS.

Developer

traduccionesliterarias.com

Website dedicated to the publication and offering of literary translation services. Developed using HTML, CSS, and JS. I utilized Bootstrap as a framework for the styles.

Content writer - developer

orbislibris.com

I developed this personal website using the no-code editor Elementor for Wordpress. There, I publish reviews of literature and philosophy books edited in Spanish, English, and French.

KNOWLEDGE

**HTML, CSS, Javascript
React, Redux, Bootstrap, Tailwind, Styled Components, Git, Github, Wordpress**

For design, I have used Figma and Sketch among other tools.

In Backend, I have basic knowledge of MYSQL.
